GOOD TO KNOW

What are Lumens?

Lumens are the measurement of total light output emitted from a light source.

How to work out lumens per watt simply

280 Lumens ÷ 6 Watts = 56 Lumens per Watt

What is a Beam Angle?

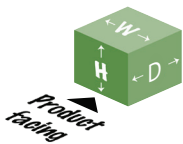

The beam angle is the degree of width of light that emanates from a light source. Aurora LED lamps have a beam angle range between 38° and 150° suitable for most applications.
